Plásticos Alco was founded to manufacture industrial parts using injection moulding machines for several sectors such as agricultural equipment, food packaging...

Our brand PLASTGrommet was created to sell plastic eyelets for the digital printing market, later on, eyelet machines and storage racks were added to our offer.

Opening of a US subsidiary (Miami) to serve the North American market.

We are now present in more than 30 countries exporting 70% of our turnover.
COMPANY PRESENTATION

- Constant innovation
- We are manufacturers
- Health & Safety first
- Environmentally responsible
- Sales in more than 30 countries
- Constant growth

The best finishing solutions for large format printing!

**Equipment**

The R&D department designs all equipment with the highest degree of safety in mind and machines pass an independent exam in order to get the CE marking.

Our eyelet presses have been designed to work only with PLASTGrommet products.

Different sizes available: Ø8, Ø12, Ø16, Ø25 and Ø40mm.

Choose the equipment that suits your needs better

Automatic machines: The road to productivity

HOW DO THEY WORK?

1. Connect the machine
2. Load eyelets and washers
3. Some models have sensors for quality control
4. Press the foot pedal to set the eyelets
5. Safety first: highest protection around setting area
6. Eyelet spacer for easy settings

www.plastgrommet.com
The Roll 2 Roll is a high output eyeleting machine with which a single operator can set eyelets on both sides of the banner on a fully automatic mode. It features adjustable width, automatic edge alignment, rewinding unit with tension control and a slitting module to cut banners. Operator interface is extremely easy to use, being able to control distance between eyelets and from the edge, banner length ...

It features two working modes, “Roll2Roll” to eyelet full rolls and “Banner” where operator can input banner length and number of eyelets and the machine will automatically slit the banner once finished.
Choose between full rolls or banners to the desire length

**Mode “Roll 2 Roll”**
- The roll is unwound and eyelets are set.
- The rewinding unit with tensioning system will perfectly finish the rolls even with eyelets already set.

**Mode “Banner”**
- Roll is unwound and eyelets are set.
- Once banner has reached the correct length, it automatically will be slitted between the last eyelet of the banner and the first one of the next as shown.

230-240 v 1.5 kw 6 bars/87 psi
POWER SUPPLY KW COMPRESSED AIR
Reasons to choose Roll2Roll:

1. Easy roll loading and wrinkle free with its tensioning systems.
2. Adjustable distance between eyelet machines to make any roll width between 600 and 2400mm (model shown).
3. Edge-alignment system with photo-sensors and pneumatic adjustment.
4. Easy to use operator interface with large touchscreen.
5. Traction pulling station with adjustable pressure rollers to work with different banner widths.
6. It can set eyelets on both sides of the banners or on a single one depending on your requirements.
7. It is possible to add a stop every X meters to perform wind-slits (to be done manually).
8. Precise slitting unit with rotary cutter.
10. Rewinding unit with tensioning system and pneumatic shaft. Rolls are finished even with eyelets already set.
The ultimate eyelet solution for big volume users
A SINGLE OPERATOR CAN DO THE JOB

Roll2Roll Lite  

For customers that need to eyelet full rolls but not require a fully automatic system. Increase production and reduce labor cost with the new Roll2Roll Lite. To eyelet full rolls won’t be a problem anymore.

- Operator pulls the banner using a handwheel.
- With a single button setting is done on both sides of the banner.
- Adjustable working distance for different roll widths (model shown is for 600mm – 1600mm).
- Accurate settings: if eyelet marks are printed with the RIP, operator can set over them using the laser pointer and the mirror provided.

- **Unique 2 in 1 feature**: one of the machines turns 180° and can be used as a standard eyelet press to finish banners, no need to invest in another machine.
- Optional kit: banner holding steel plate and foot pedal (as shown right) to work as a traditional eyelet press.
- Roll 2 Roll Lite can be assembled with Evolution or AutoCross eyelet machines, depending on customers’ requirements.

www.plastgrommet.com
Multipress has been designed with large volume users in mind, it is fast (electric), reliable (washer and eyelet detector), features a double washer raceway, it can work with fabrics as well as PVC banners and it will inform you when maintenance is due, a must have for companies finishing large number of banners.

Ref: Multi12
**Reasons to choose Multipress:**

- It can work with different types of materials: fabrics, corrugated plastics, clear foil, PVC banners ...

- Adjustable cutting pressure.

- Adjustable eyelet closing pressure, even on thin fabrics material will not roll.

- Eyelet and washers sensors, to prevent incorrect settings.

- Touchscreen, allowing you to choose sensors, working mode, language, number of eyelets set ...

- Laser pointer for accurate setting.

- Double washer supply on raceway. If one side is empty the other automatically works.

- Pre-cutting mode for special materials. When operator presses the pedal, machine will first cut the hole and then set the eyelet (no need to press the pedal again).

- Operator safety first: if any of the security devices are removed, machine will not work showing a warning message on the screen.

- Powerful engine (1 HP) with transmission belt. Extremely easy to unblock when operator sets one eyelet over another.

- Being electrical means fast cycles, up to 50 eyelets per minute.

- Easy maintenance: when it is due a warning message will be shown on the screen.

- Eyelet spacer so all of them are set to the same distance.

- Available for 8mm and 12mm PLASTGrommet eyelets.
AutoCross

Perfect for mid-size customers!

The perfect machine for mid-size customers working on fabrics and PVC banners. AutoCross has been designed for volume users who do not require as many features as Multipress can offer but still need to work on a wide range of materials, from fabrics to PVC banners.

Reasons to choose Autocross:

- It can work with different types of materials: fabrics, corrugated plastics, clear foil, PVC banners ...
- Adjustable cutting pressure.
- Adjustable eyelet closing pressure, even on thin fabrics material will not roll.
- Laser pointer for accurate setting.
- Operator safety first: if any of the security devices are removed, machine will not work showing a warning light.
- Powerful engine (1 HP) with transmission belt.
- Extremely easy to unblock when operator sets one eyelet over another.
- Being electrical means fast cycles, up to 50 eyelets per minute.
- Easy maintenance.
- Eyelet spacer so all of them are set to the same distance.
- Available for 8mm and 12mm PLASTGrommet eyelets.
Evolution

For PVC banners!

Our pneumatic machine for mid-size companies working with PVC banners.

Evolution has been designed for mid-volume users who do not require as many features as Multipress or AutoCross can offer but still need to work with an automatic machine.

High productivity

Ref: APM060B2

Reasons to choose Evolution:

- It can work with PVC banners and semi-rigid materials as corrugated plastic.
- Laser pointer for accurate setting.
- Operator safety first: if any of the security devices are removed, machine will not work.
- Castor mounted, possible to move the machine on the ground or table.

- Eyelet spacer so all of them are set to the same distance.
- Evolution works with compressed air, the faster you set eyelets the more liters you will require.
- Machine can set up to 35 eyelets per minute.
- Available for 12mm and 16mm PLASTGrommet eyelets.
- Optional stands available.

Work effortless having same setting quality all day long!

Our range of lightweight pneumatic eyelet machines offers shop owners an affordable way to finish their banners and print jobs effortlessly, reducing their production times and ensuring a constant quality setting during the finishing process.

With this piece of equipment bigger banners jobs will not be a problem anymore and you will be able to make them faster and safer than ever, as machines have a safety guard to prevent eyelet setting if there is any object underneath the die (such as operator’s finger).

Queen model has a thumb button to activate the setting while Speed Queen features a foot pedal leaving operator’s both hands free to hold the media.

These eyelet presses have been designed to set PLASTGrommet clear eyelets on different type of materials: PVC banners, Coroplast ... but not on fabrics where they can create wrinkles around the eyelet.

Ref Queen: QUEEN12
Ref SQueen: SQUEEN12

* Platform on wheels: REF: 2002017

- For PVC banners - Not for fabrics
Reasons to upgrade to a pneumatic eyelet press:

• No effort required to eyelet banners.
• Safety guard that covers setting area.
• No assembly needed, just plug the air hose.
• Each size requires extra tooling.
• Heavy duty machine for large volume shops.
• Light weight, easy to move (10 kg.)
• Available for Ø8, Ø12 or Ø16mm. Each size requires extra tooling.

You can choose between two models

With foot pedal: Speed Queen
With thumb button: Queen

Stand with folding sides.
Semi-automatic

**Crossover**

For a wide range of materials!

- It works on fabrics, PVC banners, plastics ...
- Foot pedal: operator has both hands free.
- Safety protection around the setting area.
- Cutting adjustment (even for light fabrics) and adjustable eyelet closing pressure.
- It only requires pneumatic connection.
- Available for Ø8, Ø12, Ø16, Ø25 or Ø40 mm. Each size requires extra tooling.

**PVC**
- For PVC Banners

**Medium productivity**

A must have on every sign shop! Light & portable.

Low productivity

**HPS025**

Portable self-piercing eyelet press for clear plastic eyelets.

Our entry level hand press is the perfect tool for small sign shops. There is no need to work on a fixed position and you can easily set eyelets on your bench or ground.

This eyelet press has been designed to set clear eyelets on different materials such as PVC banners, Coroplast ... but not on fabrics where it can create wrinkles around the eyelet.

- For PVC banners
- Not for fabrics
Reasons to use HPS025:

- No need to pre-cut the material, machine does cutting and setting in a single operation.
- Offered as a package deal: hand press, die and 250 clear eyelets.
- Available for Ø8, Ø12 or Ø16mm. Each size requires extra tooling.
- Portable, move the press and not the banner.
- European manufacture.

Ref: HPS025
### Hand presses

**HandPro**

#### Reasons to choose HandPro:

- It works on a wide range of materials: fabrics, corrugated plastics, clear foil, PVC banners …
- Adjustable cutting pressure, necessary to work with fabrics.
- Adjustable eyelet closing pressure, even on thin fabrics material will not roll.
- HandPro uses same kind of tooling as the advanced Multipress.
- Bench mounted.
- Available for 8mm, 12mm and 16mm PLASTGrommet eyelets.

Perfect for mid-size customers!

HandPro is the latest PLASTGrommet development in eyelet presses for the growing fabric market. It has been designed to work bench mounted and customer can easily adjust closing of the eyelet so it doesn’t roll even on light fabrics.
Corner Rounder

Perfect tool to round edges!

- A must have for customers using rigid media as Dibon.
- Available for different radius (6, 10 and 14 mm).
- Work on: Foamboard, Dibon, cardboard, PP sheets, polythene ...
- It is possible to transform an existing hand press HPS 025 into a Corner Rounder using kit code CR_R.
- Cut materials up to a maximum of 15 mm thickness.

Ref: HPS020R

Entry level hand press for fabrics!

- Available with two types of dies, for PVC banners and fabrics.
- Self-piercing for PVC banners and with pre-cut for fabrics.

Option 1 (PVC)
Self-piercing for: Ø8, Ø12 y Ø16mm

Option 2 (Fabrics)
Needs pre-cut but no need to change the tooling. Ø8, Ø12, Ø16, Ø25 y Ø40mm

Low productivity

Ref: HPS020R

www.plastgrommet.com
Clear Eyelets

Reasons to choose PLASTGrommet:

• They will not rust when set outdoors.
• Nearly invisibles, they help you to improve the look of your banners.
• Free of heavy metals and anti-corrosives.
• Free of PVC.
• UV protected.
• Certified for cold weather.

PLASTGrommet recycling advantages:

• PLASTGrommet offers the only true recyclable eyelets in the market.

• Using them, PP and PE banners are totally recyclable in the PET and HDPE waste stream.

• Certified by AIMPLAS (Plastic Technology Centre) with project # PRO08-0184.

• Clearly the ultimate eyelet solution for banners.
Our eyelets work in the same way as the traditional metal ones.

- The press is the one making the hole, not the eyelet.
- The eyelet bends under pressure.
- Eyelet neck closes over the washer.

On tensile strength tests, banner always breaks, not the eyelet!

Sample before the test

Sample after the test

The tensile test consists of subjecting a test piece to a continually increasing tensile strain to fracture. Two layers of 500 grs/m² PVC banner with a welded PVC strip in the middle. During the testing, banner broke at 163.06 Kg while the eyelet didn’t.
Clear eyelets

Ø08 mm
Rigid and semi-rigid materials:
• Polypropylene sheets.
• Polyethylene sheets.
• Flexible PVC.
• No washer needed

Ø12 mm
For all kind of applications:
• Corrugated PP (Coroplast).
• PVC banners.
• X-banner
• Foam board.
• Fabrics

Ø12 mm long neck
• Longer neck for heavier banners.
• On rigid materials it is possible to use just the eyelet (no washer).
• Thicker rigid materials.
• Same washer as regular 12mm

STORAGE RACKS ADVANTAGES

1. Avoid damage to the rolls
2. Save space
3. Heavy duty casters with brake
4. Made in steel
5. Superb design
6. Optimized packaging
Our heavy steel construction Bull Rack has been designed with sing makers in mind as you can easily access any of the 15 rolls (up to 162 cm wide).

It is mounted on heavy duty locking wheels for easy maneuver around your print shop and there is an optional vinyl cutter available.
Specs

- Product dimensions: 147,5 x 184 x 44 cm (L x W x H).
- For rolls up to 162 cm wide.
- Holds 15 rolls – 2”/3” core.
- Maximum roll OD: 16 cm.
- Loading capacity 575 kg
- Shipped disassembled.

Flat packaging

Save space using your walls for roll storage

WALL & GROUND FIXATION!

WallRack

Use your empty walls to store your vinyl.

Wall Rack is the perfect solution to organize your print shop. It can be fixed on the wall and also on the ground for better stability.

Mounting hardware is included.
Specs

- Product dimensions: 183 x 184 x 22,4 cm (L x W x H).
- Holds 10 rolls - 2”/3” core.
- Maximum roll OD: 16,5 cm.
- Roll size up to 162 cm.
- Loading capacity 300 kg.
- Shipped disassembled.

THE ERGONOMIC SOLUTIONS FOR ROLL STORAGE!

EasyRack

Avoid back pain when loading and unloading rolls due to its ergonomic design.

Easy Rack has been designed to make your job easier. It has a hinge mechanism in all positions to reduce the overexertion needed when lifting heavy rolls from the ground that often will lead to back pains. Easy Rack is mounted on locking wheels and has a convenient handle to move it around your production area.

- Move and unload rolls effortless.
- Reduce times off work.
- No more back pain.
**Specs**

- Product dimensions: 101 x 190 x 44 cm (L x W x H).
- For rolls up to 162 cm.
- Holds 16 rolls – 3” core.
- Maximum roll OD: 19cm
- Loading capacity: 460 kg
- Shipped disassembled.

**Flat packaging**

- Roll storage system with hinge mechanism
- Lockout device to prevent that rolls fall out during transport

- Ref: PHTIBMA
Loading rolls won’t be a problem anymore.

AVOID BACK INJURIES

Use the Quick Lifter to avoid back injuries and to load alone media rolls directly from the ground to the printer with no effort.

Handling media rolls is an issue at any print shop. With the Quick Lifter you will be able to feed printers up to 3.2 meters easily as it is battery operated.
Specs

- Load rolls from the ground with no effort.
- One person can do the job, perfect for night shifts.
- Battery operated, no crank handles or foot pumps.
- Avoid back injuries.
- For rolls up to 320 cm and 150 Kg.
- Lifts up to 120 cm
- Battery life: Over 100 cycles (depends on roll weight).

Ref: PHTIQL
**BullRackXXL**

- Product dimensions: 131 x 346 x 90 cm.
- Maximum roll OD: 3,2 m
- Loading capacity per roll: 100 kg
- Locking wheels

**MultiRack**

- 2”/3” core.
- Product dimensions: 184,5 x 85 x 102 cm.
- Maximum roll OD: 122 cm
- Loading capacity per roll: 12 kg
- Locking wheels

IN FACT, WE ALSO MANUFACTURE SQUEEGEEES & SAFETY RULERS
Squeegees

Daily use squeegee - Green

Manufactured in a polyblend, it features high-stability twin ribs for easy handling and pressure control. It has a strong memory, medium flex, high glide and four rounded corners. Available in 10 & 15cm.

FLEX squeegee - Blue

Manufactured in a polyblend, it features high-stability twin ribs for easy handling and it adapts to difficult surfaces. It has a medium memory, highly flexible, high glide and four rounded corners. Available in 10cm - 4” & 15 cm - 6”.

Felt edge squeegee - red

Our red felt edge squeegee is a unique combination of our everyday-use polyblend squeegee with a soft, smooth, felt edge to help prevent scratching when applying vinyl. Available in 10cm - 4” & 15 cm - 6”.
Microfiber Marathon squeegee

Has a unique microfiber edge to avoid scratching

Microfiber lasts longer and it is rated for up 200,000 Wyzenbeek double rubs.

It can be used either wet or dry.

Squeegee type recommended by Avery Denninson for their Conform Chrome film applications.

Available in 10cm - 4” & 15 cm - 6”.

Felt wings:

Self-adhesive felt wings add a soft edge to any squeegee. They make application safer as they prevent the hard squeegee edge to mark or damage your vinyls.

Supplied in packs of 5.

Available in 10 cm - 4” & 15 cm - 6”.

R10cm: PHTIEHAV
R15cm: PHTIEHAV15

R10cm: PHRRF10
R15cm: PHRRF15
**Safety rulers**

- Heavy duty aluminium construction, non-slip mat and anodized in red.
- The curved aluminum finger guard is designed to give the best protection.
- Its stainless steel cutting edge prevents the ruler to wear away with the knife.

Stainless steel cutting edge  
Finger guard
Signmaking tools

**Felt block squeegee**

Pro: PHREFAD+
Eco: PHREFAD10

Felt block squeegees are made out of felt to reduce scratching on vinyl or digital prints. Perfect for applying big stickers to cars and windows.

Two qualities available.

**Metallic blade**

**Big plastic blade**

**Plastic blades**

Pro: PHREFAD+
Eco: PHREFAD10

Metallic scraper to clean any debris on glass surfaces. The scraper has an ergonomic handle and a retractable-blade mechanism.

PHRRMQR

An ideal solution to remove waste.
Orange: general purpose.
Blue: (polycarb) uneven surfaces.
Yellow: (acryl) flat surfaces

100 replacement blades pack now available

**RHTIRAR14-25**
**RHTIRAR05-25**

Made of flexible material, it is ideal to use on delicate surfaces.
Orange for general purpose.
Blue uneven surfaces - Polycarb

*1 holder + 25 blades

ECO: 100 x 70 x 100 mm
PRO: 100 x 70 x 130 mm
**Signmaking tools**

**Precision knife**

10 spare blades: PRCP

Precision cutter made of aluminum with rubber grip for easy control.

**Eco-line cutter**

10 spare blades: PRCEL

Our Eco-Line cutter features an automatic blade lock for extra control and safety. We recommend this cutter as an all-purpose cutter for daily use.

**Vinyl Weeding tool**

PHRPZSV

Use our sharp double-ended hooked pick for removing vinyl waste to get to difficult areas such as small inner details. Designed for weeding sign vinyl and garment vinyl.

**Swivel craft knife**

PHRCCG

2 spare blades: PRCCG

Specialty cutter with swivel head for curves and quick direction changes. Rubber grip for easy handling. This cutter works like a plotter and will allow you to cut any design, no matter the shape.

**Bubble-popping pen**

RHRBAB

It is a large ballpoint-pen-style tool with a retractable needle point for removing air bubbles from applied banner graphics.

**Weeding pen**

PHTIPEN

Handy retractable ballpoint pen style tool, for weeding vinyl and laminated substrate after cutting operation. You can use it along with our weeding tweezers.
**Tweezers**

Stainless steel tweezers with coated handle for secure grip. Use this tool when you need a fine finish.

**Lift Stick**

The plastic Lift Stick is used to aid in the lifting of pressured sensitive material and in the removal of adhesive from surfaces, without scratching the substrate.

**Handle magnets**

Handle magnet for vehicle wrapping and graphic installation: Will NOT harm your graphics, vehicle or sign substrates. Use them instead of premask or masking tape.

**Suction cup**

An extra hand when you need to carry large panels. Easy snap on handle, the rubber suction cap will not harm the materials. Maximum holding capacity is 40 kg.

**Snitty safety knife**

A standard double edge razor blade is locked securely in the plastic handle. The integrated hold-down skid flattens the material ahead of the blade edge, reducing wrinkles when cutting papers.
Signmaking tools

Roll clips

- Faster and easier than tape, rubber bands or paperclips.
- Designed with a finger pull for easy handling.
- Two sizes per bag (L + XL)
- Packs of 12 or 50 pcs

Media Cards

PHTIEIR

To categorize your materials. At a glance you can identify brand name, material type and specification. Media Cards work in horizontal or vertical racks and fit into any 3” core. 10 pcs pack (5 colors x 2)

Cutter for Back Paper

PHRCRV

Perfect tool to remove the backing paper on vinyl, can be used as a standard cutter as well
Cut perfect straight edges on any foam board depth between 3 and 13 mm. On-board blade storage with 5 spare blades.

Compatible with safety rulers

Cut perfect V-grooves on foam board up to 12,7 mm. On-board blade storage with 5 spare blades.
Signmaking tools

**Straight/Bevel cutter**

Create perfect adjoining foam board joints. The innovative ergonomic and dual blade cutter creates one-stroke fine results.

**Circle cutter**

Cut perfect circles from 25 to 150 mm in diameter. Centre depth indicator shows blade progression. Centring pin and clear acrylic safety dome.

**Rabbet cutter**

Simply rotate the angled base block and the straight cutter becomes a 45° bevel cutter. With an ergonomic handle and adjustable blade depth.

**Freestyle cutter**

Cut free-form shapes with this innovative push-style cutter. Easy to use, just insert the blade into the foam board and push to follow the shape. Our freestyle cutter works with up to 5 mm foam board.

**Replacement foam board blades**

PRICRC PRICCL PRIBR2V
Clear Cutting mat

**PHRACT**
Tool that protects the work surface from scratches and cuts. It can be used on both sides. Made of self-healing materials. 5 mm thickness. 120 / 150 cm width and 20 m maximum length.

**PHTICMAG**
Available in different pre-cut sizes:
- 60 x 120 cm & 250 x 120 cm
- 60 x 150 cm & 250 x 150 cm
- Made-to-measure: 120 or 150 cm wide and up to 20 m long

**Magnetic belt clip**

**PHTICPT**
This belt clip contains strong magnets for holding tools, car wrapping magnets, etc. Made of durable 1,680-denier ballistic polyester.

**Pro magnetic drill holster**

**Magnetic wristband**

**PHTIMMAG**
With embedded strong magnets for holding your cutting knives. Wristband can be attached to ladders, metal shelves... Made of durable 1,680 - denier ballistic polyester. One-size-fits-all.

**Magnetic belt pouch**

**PHTIBMAG**
Adjustable to left, right or onto another tool case. Magnetized to store cutting knives and small tools. Compatible with most tool belts. Made of durable 1,680 - denier ballistic polyester.
## Signmaking tools

### Tool bag

**PHRBHP**
Made of nylon with a lot of storage space. Adjustable belt with plastic clip. Internal metal plate to hold magnets. Reversible, protect from accidental scratches.

### Tool bag PRO

**PHRBHG**
Made of nylon, 6 pockets with a lot of space for your tools. Adjustable belt with plastic clip. Internal metal plate to hold magnets.

### Toolbag Kit

**PHRKBH**
It features different pockets for tool storage. It can be used with the belt clip or with the belt loop. There are no metal parts on the front in order to avoid accidental scratches on vehicles. It features an internal metal plate.

### Toolbag Kit PRO

**PHRKBHP**
Features an adjustable belt clip and multiple pockets for tool storage. There are no metal parts on the front in order to avoid accidental scratches on vehicles.

### Includes

Banner hanging solutions

PVC reinforcement

PVC coated EXTREME

PSRFS40

High quality 900 gr/m² Panama PVC fabric that can be welded to reinforce banner edge. Available 40 mm x 58 m.

1300kg: PSRFSE46
100kg: PSRLE1146

This weldable webbing lets you reinforce your fabrics. PVC-Coated Webbing can be welded onto fabrics using hot air, hot wedge or high frequency welding. 46mm x 10m

Banner tape - Adhesive reinforcement

Banner reinforcing tape for sewing

PSRFA40

Our Banner tape is the economic solution to reinforce the perimeter using a PVC coated canvas with acrylic adhesive. Available in 40 mm x 25 m.

PSCRL25

Perfect for flags and textile banners. Available in 25 mm x 100 m.

EXTREME-PLUS tape

Pressure roller

PSDCEP25

It is a strong tape with an overlaying liner on both sides. The thick glue on it (400 μ) offers an extremely strong adhesion when hemming the banner. It is our highest quality double sided tape. 25 cm x 25 m

PSOMRPCR

1 axle with bearings, 45 mm
2 axles with bearings, 45 mm
2 axles with bearings, 80 mm

A tool all sign makers should have to work with double sided tapes and hand held welders. High quality and durability (ball bearing, wooden handle and siliconeroller)
Cable ties are the fast and inexpensive way to secure signs and other items. Simply adjust to desired size and lock them permanently with a ratcheting mechanism. Different sizes available. In black and white.

Different sizes available. In black and white.

Elastic cord with a plastic ball at the end. This particular cord can be used as a fixation for awnings or for tents to support frames. Available in black color 18 & 25 cm.

Elastic cord with a plasticised metal hook at the end. This model can be used on banners and tents as fixation to frames. Available in black color in 18, 25 & 60 cm.

Single core in natural rubber with anti UV protection. High-strength PES outer covering. Excellent UV resistance, good abrasion resistance. Available in Ø8 & Ø6 mm, white and black on 100 meters rolls.

Available for Ø8 mm. Ø8 hook comes in two parts and can be closed easily by hand.

Specifically designed to grip up to 5 mm thick fabrics, perfect for banners, camping, marine use, general DIY... Midi: Holds up 100 Kg. / Mini: Holds up 45 Kg.
The automatic welding machine FORPLASTP2 is an efficient and manoeuvrable device for welding truck tarpaulins, tents, awning materials and advertising banners. It produces optionally 20, 30, 40 and 45 mm wide overlap welds and may also be converted for welding in welting ropes. In addition, by mounting hem welding accessories, the automatic machine can without any difficulty be used for the production of 20, 30, 40 and 45 mm hems. It is possible to modify the machine to work with weldable webbing.

Webbing strap with buckle

Manufactured with high tenacity polyester yarn, this strap offers great resistance for building wraps. With an optimal UV resistance. Available in: 15 mm x 60 cm y 25 mm x 60 cm (white & black) Longer model: 120 cm (only in 25 mm width).

Welders

Quick S Electronic

The hot-air welding equipment Quick-S-Electronic stands out for its unique ergonomic handle. Thanks to its ergonomics and light weight the user can handle the equipment professionally and effortlessly.

The equipment has a heat output of 1500 W 230 V and a constant and completely reliable electronic control for temperatures up to 700 °C.

The all-round equipment for welding all thermoplastics, technical textiles, tarpaulin sheets, pond sheeting, roof sheeting and swimming pool construction sheeting.

Forplast-P2

The automatic welding machine FORPLASTP2 is an efficient and manoeuvrable device for welding truck tarpaulins, tents, awning materials and advertising banners. It produces optionally 20, 30, 40 and 45 mm wide overlap welds and may also be converted for welding in welting ropes. In addition, by mounting hem welding accessories, the automatic machine can without any difficulty be used for the production of 20, 30, 40 and 45 mm hems. It is possible to modify the machine to work with weldable webbing.

Hook & loop

Sew-on hook & loop: For textile or plastic materials.
Hook & loop with hot-melt adhesive: to be used on all surfaces (except PVC).
Hook & loop with acrylic adhesive: Recommended for plastic surfaces.
Available in 25 mm & 50 mm (white & black)
